

Twin Head Adjustable Emergency Light

This emergency light features twin adjustable lamp heads. It is designed for emergency and security lighting applications, and includes a function meter, individual lamp switches, and a test button.

Product Overview

High-Efficiency Emergency Lighting

This twin head adjustable emergency light is engineered for reliability in critical situations, featuring low power consumption and high brightness output. Designed for longevity, it ensures essential illumination in public spaces such as factories, hotels, and schools during unexpected power failures. The unit includes intuitive controls like a test button and individual lamp switches for easy maintenance and operation.
