

Twin Head Halogen Work Light with Adjustable Tripod

These twin-head halogen work lights provide focused illumination for various tasks. The adjustable tripod stand offers stability and variable height settings, making it suitable for construction sites, workshops, and garages.

Product Overview

Professional Illumination Solution

This twin-head halogen work light system is engineered for high-intensity, focused illumination in demanding professional environments. Mounted on a heavy-duty adjustable tripod, the unit provides exceptional stability and flexible positioning for construction sites, workshops, and garages. The robust design includes protective grills to safeguard the halogen bulbs, ensuring reliability and durability during intensive daily use.

Technical Specifications
