

Twin Shaft Concrete Mixer

This is a twin shaft concrete mixer used for construction purposes. It efficiently mixes concrete and similar materials.

Product Overview

High-Efficiency Twin Shaft Mixer

The JS750 twin shaft concrete mixer is engineered for professional construction environments requiring consistent and high-quality concrete production. Its robust horizontal shaft design ensures thorough material homogenization and operational longevity. Designed for demanding site conditions, this equipment features a heavy-duty frame and a high-capacity loading system for optimized mixing cycles.

Technical Specifications

Model	JS750
Type	Twin horizontal shafts forced mixer

Key Performance Metrics

Performance Highlights

750 L

Discharge Capacity

Safety & Compliance

Operational Safety Tags	Prohibition of standing under hopper, Industrial heavy-duty build, Forced mixing mechanism
