Product Overview

High-Efficiency Mixing Technology

The Twin Shaft Spiral Mixer provides an optimal balance between mixing quality, comparable to planetary systems, and high production output. Engineered for rigorous industrial demands, it utilizes a robust twin-shaft configuration with intermeshing spiral elements to ensure homogeneous blending. This versatile machine features advanced Italian-designed gearboxes and is built to withstand intensive daily operation.

Key Features

Standard Equipment

- Automatic greasing system
- Manual emergency opening gate
- Italy design gearboxes
- Anti-falling and anti-dust device (on skip versions)

Available Options

Heavy-duty anti-wear material, Skip loading version

Technical Details

Primary Application

Concrete Machinery • Industrial Mixing

Mixer Configuration

Twin shaft with intermeshing spirals
