

Twin-Thread Spool Holder for Sewing Machines

This twin-thread spool holder provides efficient and organized thread management for sewing and embroidery. Its vertical stand features adjustable height and a base with two spool pins, accommodating two thread spools simultaneously.

Product Overview

Professional Twin-Thread Management

This adjustable twin-thread spool holder is engineered for efficient and organized thread management during sewing and embroidery projects. Featuring a robust vertical stand and two spool pins, it allows for the simultaneous use of two thread spools, significantly streamlining complex stitching tasks. Its durable construction ensures reliable stability, making it an essential upgrade for both sewing enthusiasts and professional garment manufacturers.

Technical Specifications

Spool Capacity	2 spools
Applications	Sewing, Embroidery, Garment Manufacturing

Key Features

Core Features

- Adjustable height for various spool sizes
- Sturdy base design for improved stability
- Simultaneous dual-spool feeding capability
- Durable, long-lasting construction
