

Twist Wire Cup Brush with Nut

This cup brush features a twisted wire design for effective material removal. It is equipped with a nut for secure attachment to rotary tools.

Product Overview

Industrial-Grade Surface Preparation

This cup twist wire brush is engineered for demanding industrial surface preparation, cleaning, and deburring tasks. Featuring a robust twisted wire construction, it provides aggressive material removal and exceptional durability for heavy-duty applications. Designed for compatibility with standard angle grinders, it effectively removes rust, scale, paint, and stubborn coatings from metal and concrete surfaces.

Technical Specifications

Brush Diameter	75 mm
Wire Diameter	0.5 mm
Thread Size	M14

Usage & Safety

Safety Requirements	Wear eye protection
