

Twisted Pair Communication Cable

Communication cable designed with twisted pair conductors for reliable data transmission. Features color-coded wires for easy identification and a protective outer jacket for durability.

Product Overview

High-Performance Communication Solution

This twisted pair communication cable is engineered for reliable data transmission across various networking applications. Featuring color-coded wires for simplified identification and termination, the cable is protected by a durable outer jacket to ensure long-term signal integrity. It is designed to meet the demands of professional networking environments where performance and ease of installation are paramount.

Technical Design

Cable Structure

- Twisted pair conductors
- Color-coded wire insulation
- Protective outer jacket

Technical Identifiers

SC6503-P, SAELI-Y

Performance

Key Benefits

Reliable Data Transmission • Optimal Signal Integrity • High Durability

Application

Intended Applications

Various professional networking applications requiring high-performance data links.
