

Two-Burner Built-In Gas Cooktop

High-efficiency gas hob featuring two burners with precise flame control and integrated ignition. It has a sleek glass surface and is designed for built-in installation.

Overview

Modern Built-In Gas Solution

This two-burner built-in gas cooktop combines style and functionality for professional kitchen environments. Featuring a durable glass panel and robust cast iron support, it is designed for both reliability and aesthetic appeal. The inclusion of copper burner components and an integrated timer ensures precise cooking control for demanding culinary tasks.
