

Two-Burner Gas Hob Cooktop

This gas hob cooktop is designed for cooking. It features two burners, each with a circular grate and control knobs for adjusting flame intensity.

Product Overview

Professional Performance Gas Hob

This two-burner gas cooktop offers a sleek aesthetic with its durable black tempered glass surface. Engineered for efficiency and power, each burner provides a robust 4.7kW output suitable for various culinary tasks. The unit features a double-ring brass cap burner design and secure 5-claw pan supports to ensure stability and even heat distribution for professional-grade cooking results.
