Overview

Modern tempered glass cooktop featuring efficient burner design.

High-Efficiency Two-Burner Cooktop

This two-burner gas cooktop features a durable tempered glass surface designed for easy cleaning and a modern aesthetic. Engineered for efficiency, it utilizes a powerful blue flame system that minimizes gas consumption while saving cooking time. With automatic Piezo ignition and robust construction, this appliance is an ideal solution for professional kitchens seeking reliable performance and cost-effectiveness.

Design & Build

Tempered glass surface with adjustable airflow levers for optimal combustion.

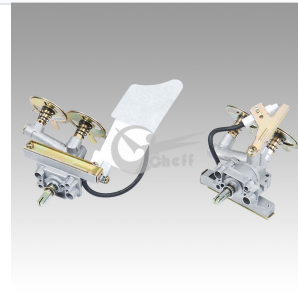

Intuitive control knobs with clear settings for easy operation.

Surface Material	Tempered Glass
Body Material	Powder Coating, Stainless Steel
Glass Thickness	8 mm

Performance & Features

Durable brass burner caps engineered for even heat distribution.

Precision-engineered valve system for reliable flame control.

Key Benefits

Low Gas Consumption • Easy to Clean • Powerful Blue Flame • High Efficiency

Ignition Type	Automatic Piezo Ignition
Burner Cap Material	Brass

Technical Specifications

Burner Size

90 mm

Burner Diameter

Technical Data

Feature	Specification
Burner Count	2
Panel Material	Tempered Glass
Burner Cap	Brass
Glass Thickness	7mm / 8mm
