

Two-Door Top-Freezer Refrigerator

This two-door refrigerator features a top freezer compartment for frozen goods. It utilizes energy-saving technologies and includes an LED light.

Product Overview

Efficient Cooling Performance

This two-door top-freezer refrigerator is engineered with intelligent technology to ensure optimal food preservation and energy efficiency. It features high-performance components like a high-efficiency compressor, R600a refrigerant, and an environmental temperature transmitter for automatic seasonal adjustment. Built with anti-bacterial materials and a bright, low-heat LED interior, it offers a reliable, healthy, and eco-friendly cooling solution.

Technical Specifications

High-efficiency wire tube evaporator ensures superior heat exchange and structural durability.

Capacity and Power Parameters

Model	Volume (L)	Freezer (L)	Energy (kWh/24h)
BCD-170K	170	47	0.45
BCD-197K	197	68	0.43
BCD-217K	217	92	0.45
BCD-237K	237	105	0.46
BCD-252K	252	105	0.49

Rated Input Power

100 W
Power Input

Star Rating

3

Key Features

Integrated environmental temperature transmitter enables automatic performance adjustment based on surroundings.

Core Technologies	Energy Saving, Intelligent Temperature Control, Anti-bacterial Interior, Automatic Compensation
Lighting System	Direct Current White LED
