

# Two-Door Vertical Display Freezer

This two-door vertical freezer features glass doors and adjustable shelves for organized storage. It is equipped with interior LED lighting, digital temperature control, and a bottom-mounted refrigeration system.

## Product Overview

### Professional Vertical Display Freezer

This two-door vertical display freezer is engineered with a high-performance forced air circulation cooling system, ensuring consistent and well-distributed internal temperatures. It features triple-glazed glass doors equipped with specialized heat film for enhanced insulation and visibility. Designed for commercial reliability, the unit includes energy-efficient LED illumination and a low-maintenance condenser system.

## Technical Specifications

### Key Features

- Standard LED illumination
- Low-maintenance condenser
- Self-evaporating drip tray
- Digital temperature control
- Adjustable interior shelving

### Glass Technology

Tempered • Low-E

### Cooling System

Forced air circulation (fan-cooling)

### Door Configuration

Triple-glazed, Glass door, Heat film, Self-closing

## Mobility and Installation

### Mobility

Full direction castors with front locking brakes
