

Two-Drawer Table Component for Apparel Machinery

This table component features two drawers for storage. It is suitable for use with sewing machines or other apparel and textile machinery.

Product Overview

Industrial Sewing Table Component

This two-drawer table component is designed to serve as a versatile and sturdy foundation for various apparel machinery setups. Engineered for compatibility with a wide range of traditional sewing machine heads, it provides a reliable workspace for industrial and craft environments. The unit features integrated storage drawers, ensuring essential tools and accessories remain organized and accessible during operation.
