

Two-Gang WiFi Smart Switch

This two-gang smart switch is designed for modern home automation. It connects to a WiFi network, enabling remote control and scheduling via a smartphone app.

Product Overview

Smart Lighting Control

This two-gang WiFi smart switch offers a sophisticated solution for modern home automation. Designed with a sleek, white glass panel, it provides touch-sensitive control for two independent light circuits. The device seamlessly integrates into existing home WiFi networks, enabling remote management, scheduling, and physical operation for enhanced convenience.
