

Two-Head Piston Liquid Filling Machine

This two-head piston filling machine is designed for accurate filling of liquids and semi-liquids in diverse industries. It utilizes two piston cylinders for precise volume control and is constructed from durable stainless steel for hygiene and longevity.

Two Head Piston Filling Machine

Overview

Professional Piston Filling Solution

This Two-Head Piston Liquid Filling Machine is engineered for precision and efficiency in high-demand packaging environments. Constructed with high-grade stainless steel and sanitary components, it strictly adheres to GMP standards for hygiene and durability. Its versatile design allows for easy adjustments in both speed and volume, making it an ideal choice for diverse applications in the food, beverage, pharmaceutical, and cosmetic industries.

Technical Specifications

Key Performance Metrics

50 bottles/min

Max Filling Speed

1 %

Filling Precision

6 kg

Required Air Pressure

Available Filling Ranges

- 2-60ml
- 5-125ml
- 5-250ml
- 10-500ml
- 30-1000ml
- 100-2000ml
- 150-5000ml

Build & Quality

Compliance & Features

GMP Compliant, Stainless Steel, Leak-Proof Nozzle, Anti-Burst Design

Power Requirements

220V 50Hz
