

Two-in-One Weighing and Form-Fill-Seal Packaging Machine

This machine integrates weighing and vertical form-fill-seal (VFFS) functions. It is designed for efficient, automated packaging, featuring a multi-head weigher and VFFS system.

Product Overview

Integrated Packaging Solution

This Two-in-One Weighing and Form-Fill-Seal machine streamlines the entire packaging process by automating feeding, measuring, filling, and bag sealing. Designed for high precision and efficiency, it ensures stable performance while minimizing product damage during the packaging cycle. This cost-effective solution is ideal for businesses looking to optimize their production line for granular and bar-shaped goods.

Operational Capabilities

Automated Processes

- Feeding
- Measuring
- Filling
- Printing
- Bag Forming
- Sealing

Compatible Materials

Granules, Bars, Candy, Rice, Nuts

System Integration

Design and Construction

Core Components

- Multi-head weigher
- Vertical form-fill-seal (VFFS) system
- Control panel with display screen
- Incline conveyor
- Takeaway conveyor system

Material

Stainless Steel
