

Two-Pole Induction Motor

This two-pole induction motor operates at 2850 RPM. It features Class B insulation, IP44 protection, and a thermal protector for continuous S1 service.

Product Overview

Versatile Domestic and Agricultural Solution

This two-pole induction pump is designed for reliable performance in clean water applications. It is perfectly suited for domestic distribution, irrigation of gardens, and integration into small pressure sets. Built for efficiency and ease of use, the unit ensures dependable water delivery in sheltered environments.

Technical Features

Motor Configuration	Two-pole induction motor
Duty Cycle	Continuous duty
Safety Protections	Thermally protected, Overheat protection

Operating Conditions

Recommended Liquids

- Clean water
- Non-abrasive liquids
- Chemically non-aggressive fluids

Environment	Enclosed or sheltered from inclement weather
-------------	--

Performance

Key Performance Attributes

High Efficiency • Quiet Operation • Self-Priming • Easy Installation
