

Two Post Auto Lifter

This two post auto lifter is designed for automotive maintenance and repair. Its hydraulic system ensures smooth and controlled lifting and lowering.

Overview

Robust Automotive Lifting Solution

This two-post auto lifter is engineered for professional automotive maintenance, providing a reliable and stable lifting platform. It features a high-quality power unit equipped with an aluminum motor for enhanced durability and longevity. The system utilizes double-cylinder synchronization driven by steel cables, ensuring safe and even operation during every cycle.

Performance Metrics

Lifting Capacity

4000 Kg

Maximum Capacity

Physical Dimensions

Dimension	Value
Min. Height	100mm
Max. Height	1850mm
Overall Height	3612-3912mm

Safety & Control

Safety Features

Single-point manual lock release, 24V safety voltage control, Top position limit switch, Left/right synchronization

Technical Specifications

Power Unit Type

High quality power unit with aluminium motor
