

Two-Post Automotive Lift 9000LB Capacity

This car lift has a 9000LB/4.0T capacity and features an electrical lock release with a floor plate design. It includes a 24V safety control system and an auto-stop device located 200mm from the ground.

Product Overview

Professional Two-Post Automotive Lift

This 9000lb capacity two-post automotive lift is engineered for reliable performance in professional service environments. Featuring a robust dual-cylinder hydraulic system and precision balancing cables, it ensures smooth and stable lifting operations for a wide variety of vehicles. The design prioritizes safety and ease of use, incorporating advanced locking mechanisms and intuitive controls to streamline maintenance tasks like oil changes and brake repairs.
