

Two-Slice Bread Toaster with Adjustable Browning

This two-slice toaster is designed with adjustable browning settings and a removable crumb tray. It features a high-lift lever for retrieving smaller items and a reheat function.

Product Overview

Compact & Versatile Toasting

The AT4C46 is a two-slice toaster designed for efficiency and style, suitable for any kitchen countertop. It offers flexible browning control to suit individual preferences, alongside convenient features like a reheat function and a high-lift lever for easy retrieval of smaller bread items. Maintenance is simplified with a removable crumb tray, ensuring a clean and hassle-free user experience.
