

# Two-Slice Electric Contact Grill with Non-Stick Plates

This electric contact grill is designed for cooking two slices of food at once. It features non-stick plates, power/ready light indicators, and a handle lock for upright storage.

## Product Overview

### Versatile Contact Grill for Professional Kitchens

The Two-Slice Electric Contact Grill is a compact, high-efficiency appliance designed for grilling a variety of foods, from sandwiches and paninis to meats and vegetables. Featuring non-stick cooking plates and a floating hinge system, it ensures even cooking across various food thicknesses while simplifying cleanup. With its durable stainless steel exterior, integrated grease management, and adjustable temperature controls, this grill is an ideal solution for consistent, healthier cooking in any commercial or professional setting.
