

Two-Tier Dishwasher and Disinfector

This appliance washes and disinfects dishes in two separate tiers. It uses either heat or UV light to sanitize dishes after washing.

Overview

Professional Two-Tier Dishwasher and Disinfector

This advanced two-tier dishwasher and disinfection apparatus is designed for efficient cleaning and sanitization in professional environments. Featuring a durable metallic finish and transparent doors, it allows for easy monitoring of the cleaning cycle. The dual-compartment system optimizes space, with specific racks for bowls and smaller items on top and larger plates on the bottom, ensuring comprehensive hygiene through integrated heat-based disinfection.
