

Two-Tier Home Water Filtration System

This two-tiered water filtration system is designed for home use. It features a translucent blue container and a white spout for dispensing filtered water.

Product Overview

High-Efficiency Two-Tier Filtration

This two-tier home water filtration system is engineered to provide cleaner, safer drinking water through a multi-stage process. Its vertical, space-saving cylindrical design allows for easy placement in various home environments. Featuring an intuitive dispensing spout and high-quality internal filter cartridges, this unit ensures a steady supply of treated water for household consumption.

Technical Details

System Components

- Translucent blue reservoir
- Secondary filter cartridge tier
- White dispensing spout
- Durable housing

Design Type	Two-tier gravity filtration
Number of Filtration Stages	2
Primary Application	Residential, Home Use, Drinking Water
