

Two-Way Garden Hose Splitter

This two-way tap adapter allows the connection of two hoses to a single tap. It features independent flow control for each outlet, allowing regulation of water pressure to each hose individually.

Overview

Deluxe 2-Way Tap Adaptor

This deluxe two-way garden hose splitter allows for the simultaneous connection of two hoses to a single water source. It features a unique gate knife clutch with a push-pull mechanism that breaks through traditional structures for superior water mode control. Designed for durability and ease of use, it ensures a secure, leak-proof connection even when adjusting directions in a locked state.

Technical Features

Control Mechanism	Gate knife clutch with push and pull mode
Inlet Connection	Nut connection mode
Leak Protection	Yes
Directional Adjustment	Adjustable in lock state without leakage
