

Two-Way Interphone Paging System

This interphone system allows for two-way communication. It includes a handset and a separate speaker unit for paging.

Product Overview

Professional Two-Way Communication

This two-way interphone paging system is engineered for efficient communication in both residential and commercial environments. The set includes a wall-mounted handset with a durable coiled cord and a dedicated speaker unit for clear audio transmission. Designed with a streamlined aesthetic, it provides a reliable solution for paging and internal messaging needs.
