

Two-Way Motorcycle Alarm System with FSK Technology

This two-way FSK alarm system offers enhanced motorcycle security. Its water-resistant ECU ensures durability and reliable performance.

Product Overview

Advanced Security Solution

This two-way motorcycle alarm system utilizes FSK technology to deliver reliable, long-range communication between your vehicle and the remote control. Designed for professional-grade security, it offers real-time status monitoring, including visual and audible alerts. With integrated features like remote engine start and anti-hijacking protection, it provides comprehensive peace of mind for motorcycle owners.

Core Features

Key Functionalities

- Real-time status monitoring
- Remote engine start capability
- Integrated shock sensor
- Anti-hijacking functionality
- Visual and audible alert system
- Built-in time display
