

Two-Way Motorcycle Alarm System with LCD Remote

This motorcycle alarm system provides two-way communication and control via an LCD remote. The system features a high-sensitivity vibration sensor, remote start/stop capability, and a loud 125dB siren.

Product Overview

Advanced Two-Way Security Solution

This two-way motorcycle alarm system provides robust security with real-time monitoring via an LCD remote control. Designed for versatility, it features remote start and stop capabilities, high-sensitivity vibration sensors, and an anti-hijacking function. With its water-resistant components and loud 125dB siren, this system offers reliable protection and convenience for a wide range of motorcycle models.

Technical Specifications

Siren Volume

125 dB

Siren Volume

Operating Voltage

12 V

Communication Range

1000 M

Features

System Capabilities

- Real-time alarm status monitoring
- Adjustable vibration sensor sensitivity
- Emergency alarm activation
- Low power consumption design
- Water-resistant construction

Core Features
