

# Two-Way RF Power Splitter

This two-way RF power splitter is designed for radio and TV broadcasting applications. It operates within a frequency range of 5-2400 MHz and features power pass on all ports, enabling efficient signal distribution.

## Product Overview

### Professional Two-Way RF Power Splitter

This two-way RF power splitter is specifically engineered for professional radio and TV broadcasting applications. It supports a broad frequency range of 5-2400 MHz and ensures robust signal distribution through its all-ports power pass design. Built for reliability in demanding environments, this unit is the ideal choice for maintaining signal integrity while splitting signals to multiple destinations.

## Technical Specifications

### Frequency Range

**5 MHz**

Lower Frequency

**2400 MHz**

Upper Frequency

<b>Power Pass Capability</b>	Yes
<b>Model Number</b>	001-2GF

## Application Features

### Construction Quality

Durable Material Construction • High Integrity Design

<b>Primary Applications</b>	Radio Broadcasting, TV Broadcasting, Signal Distribution
