

Two-Wheel Tractor

This versatile two-wheel tractor is designed for various agricultural tasks. Its compact design and maneuverability make it suitable for small to medium-sized farms and can be equipped with different attachments.

Overview

Versatile Agricultural Solution

This two-wheel tractor is a robust and versatile machine engineered to handle a wide range of agricultural tasks efficiently. Featuring a sturdy frame and user-friendly controls, it is specifically designed to offer high maneuverability in small to medium-sized farming environments. Its adaptable design allows for the seamless integration of various attachments, making it an essential tool for plowing, tilling, and other critical farming operations.

Technical Specifications

Suitable For

- Plowing
- Tilling
- General Farming Operations

Key Design Features

Robust Engine • Sturdy Frame • User-friendly Controls • Compact Design

Model Variants

GBT610C, GBT610L, GBT610CA
