

Two-Wheel Walking Tractor

This walking tractor is a versatile agricultural machine used for various farming tasks. It features a robust engine, typically diesel-powered, and adjustable handles for operator control.

Product Overview

Versatile Agricultural Power

This two-wheel walking tractor is a robust and highly adaptable agricultural machine designed for small to medium-sized farming operations. Featuring a dependable diesel-powered engine, it provides the necessary torque for demanding field tasks while maintaining compact dimensions. The inclusion of adjustable handles allows for excellent operator control, ensuring comfort and precision during operation. It serves as a comprehensive solution for plowing, tilling, harrowing, and material transport when paired with compatible attachments.

Technical Specifications

Compatible Attachments

- Rotary tillers
- Plows
- Trailers
- Harrows

Engine Type	Diesel
Ergonomics	Adjustable Handles, High Maneuverability, Compact Design

Applications

Primary Tasks

Plowing • Tilling • Harrowing • Transporting
