

Type 60JA 11 QD Bushing Sprocket

This sprocket is designed for use with QD bushings. The sprocket is constructed from durable materials to ensure reliable performance in demanding industrial applications.

Product Overview

Industrial Power Transmission Solution

The Type 60JA 11 QD Bushing Sprocket is engineered for high-performance power transmission in diverse industrial environments. Designed for seamless integration with QD bushings, this component ensures reliable operation and efficient torque transfer. Its robust construction makes it a dependable choice for machinery and equipment requiring precision and long-term durability.

Technical Specifications

Chain Size Compatibility	60
Bushing Type	QD (Quick Detachable) Bushing
Model Identifier	60JA 11
Number of Teeth	11

Certifications & Compliance

Key Attributes	Industrial Grade, Power Transmission, QD Compatible
