

Tyre Changer for Car and Motorcycle Tyres

This tyre changer is suitable for servicing tyres on both cars and motorcycles. It features a self-centering function for efficient operation.

Overview

Professional Versatility

This high-performance tyre changer is engineered for professional automotive workshops, providing the versatility to handle both passenger car and motorcycle tyres efficiently. It features a robust self-centering system and a precision-engineered turntable with four adjustable clamps. Designed for reliability and ease of use, this equipment enhances productivity and ensures safe operation during intensive tyre service tasks.

Technical Features

Compatible Vehicles	Passenger Cars, Motorcycles
Clamping Mechanism	4-clamp self-centering turntable
Precision Calibration	Yes
