

U-Boat Platform Truck with Removable End Panels

This U-boat platform truck is constructed with a steel deck and anti-slip diamond plate for secure loading. It has removable end panels and corner bumpers to prevent scuffing.

Product Overview

Industrial-Grade Platform Transport

The U-Boat Platform Truck is a heavy-duty material handling solution engineered for transporting bulky items in confined spaces. Its narrow deck profile and removable end handles allow for exceptional versatility, accommodating oversized loads when necessary. Built with a reinforced all-welded steel frame and a durable powder coat finish, this truck is designed to withstand the rigors of demanding warehouse and distribution environments.
