

U-Shaped Immersion Heating Element

This U-shaped tubular heating element is designed for immersion heating applications. It provides efficient heat transfer in various industrial and commercial settings.

Product Overview

High-Efficiency Immersion Heating

This U-shaped tubular heating element is engineered for reliable immersion heating in diverse industrial and commercial environments. Featuring a durable metal sheath, it ensures excellent heat transfer efficiency and long-term resistance to corrosion. The design includes ceramic insulators at the terminals for enhanced safety and performance.

Technical Specifications

Shape	U-Shaped
Construction	Durable metal sheath with ceramic insulators

Customization

Customization Options	Voltage, Wattage, Dimensions
-----------------------	------------------------------

Applications

Suitable Applications

- Industrial immersion heating
- Commercial heating systems
