

U-Shaped Tubular Heating Element

U-shaped tubular heating element designed for immersion or air heating applications. Constructed from durable metal alloy, it ensures efficient heat transfer and long service life.

Product Overview

High-Efficiency U-Shaped Heating Solution

This U-shaped tubular heating element is engineered for reliable performance in both immersion and air heating environments. Constructed from a durable metal alloy, it ensures efficient heat transfer and an extended service life for demanding industrial and commercial applications. The design incorporates ceramic insulators and robust terminals to facilitate secure electrical connections and safe operation.

Technical Specifications

Design Shape	U-Shaped
Insulation Material	Ceramic
Construction Material	Durable Metal Alloy
Connection Type	Robust Terminal

Application

Suitable Applications	Immersion Heating, Air Heating, Industrial Systems, Commercial Systems
