

UF Water Dispenser Filter 440x150x400mm

This water dispenser filter measures 440x150x400mm. It utilizes ultrafiltration membrane technology to effectively filter out bacteria, viruses, and other microorganisms while retaining beneficial minerals.

Product Overview

Ultrafiltration Water Purification Solution

This ultrafiltration (UF) water filter is engineered to provide high-quality, purified water for household appliances and water dispensers. Utilizing advanced membrane technology, the system effectively removes impurities, sediments, bacteria, and viruses from the water supply. It is designed to ensure safe and healthy drinking water while retaining essential minerals.

Physical Specifications

Dimensions (L x W x H)	440 x 150 x 400 mm
