Product Overview

High-Performance Industrial Lighting

This UFO LED High Bay light is engineered for demanding industrial and warehouse environments, offering a versatile range of power options from 120W to 300W. The unit features advanced thermal management with a specialized fin-type heat sink design, ensuring optimal heat dissipation and an extended operational lifespan. Built with durable aluminum housing, this lighting solution is designed to withstand rigorous daily use in factories and large-scale storage facilities.

Technical Specifications

Available Power Ratings

- 120W
- 150W
- 200W
- 250W
- 300W

Series Identifier

FT Series 9902

Design & Build

Key Features

Fin-type Heat Sink • Aluminum Housing • Oxidation Resistant

Thermal Performance

Excellent heat dissipation through specialized fin-type design

Applications

Ideal Use Cases

Warehouses, Factories, Industrial Facilities
