

UFO LED High Bay Light

This LED high bay light is constructed with durable aluminum die-casting housing. The integrated driver and radiator design ensures effective heat diffusion and prolongs the fixture's lifespan.

Product Overview

Industrial High-Performance Lighting

This UFO LED high bay light is engineered with a durable aluminum die-casting housing, featuring an integrated driver and radiator design for superior heat dissipation. This advanced thermal management significantly extends the fixture's operational lifespan. Designed for demanding environments, it delivers high-efficiency illumination suitable for warehouses, factories, and stadiums.

Technical Performance

Light Efficiency

145 lm/w

Light Efficiency

Lifespan

50000 hours

Available Beam Angles

60°, 90°, 120°

Construction & Design

Housing Material

Aluminum die-casting

Thermal Design

Integrated driving and radiator

Applications

Recommended Environments

- Warehouses
- Factories
- Stadiums
