

UHF 50Ω Low Loss RF Coaxial Cable

This is a UHF 50Ω low loss physical foaming RF coaxial cable. It is designed for improved signal transmission in various communication systems.

Product Overview

High-Performance RF Connectivity

The Elegance Series UHF 50Ω low loss RF coaxial cable is engineered for demanding communication systems. Utilizing physical foaming insulation technology, this cable ensures superior signal transmission and reduced attenuation. It is a versatile solution available in 100, 200, 240, and 400 series configurations to suit various professional application requirements.

Technical Specifications

Available Series

- 100
- 200
- 240
- 400

Application

UHF • RF Communication • Low Loss

Impedance

50 Ω

Insulation Technology

Physical Foaming
