Product Overview

Professional Wireless Audio Solution

This UHF dual-channel wireless microphone system is engineered for reliable, crystal-clear audio transmission in professional settings. Featuring two handheld microphones and a dedicated receiver unit, the system allows for simultaneous operation with individual volume controls and frequency monitoring. Designed to minimize interference, it provides a stable signal range suitable for presentations, live performances, and public speaking events.

Technical Specifications

Channel Count	200 channels
Frequency Band	UHF
System Configuration	Dual-Channel, Wireless, Handheld

Features & Controls
