

UHF Wireless Handheld Microphone System

This is a UHF wireless microphone with a single channel. It's suitable for applications such as public speaking, karaoke, and presentations.

Product Overview

Professional Wireless Audio

This UHF wireless handheld microphone system delivers reliable audio performance for diverse environments. Engineered with a dynamic capsule for clear sound reproduction, the system features a robust receiver with dual-antenna diversity to minimize interference and dropouts. It is an ideal solution for public speaking, karaoke, and professional presentations requiring mobile audio freedom.

Technical Specifications
