

UHF/VHF/FM Signal Amplifier

This compact amplifier enhances UHF, VHF, and FM signals for improved reception. It includes multiple output ports to distribute the amplified signal to multiple devices.

Product Overview

Professional Signal Enhancement

This UHF/VHF/FM signal amplifier is a compact, high-performance solution designed to boost signal strength for television and radio reception. It is specifically engineered to resolve issues in areas with weak signal coverage by providing reliable amplification. With its multi-port output design, it allows for seamless signal distribution across multiple devices simultaneously.

Technical Specifications

Connectivity

- 1x Signal Input (IN)
- Multiple Signal Outputs (OUT)

Frequency Bands

UHF, VHF, FM

Key Features

Applications

Television • Radio • Signal Distribution
