

UL/FM Approved Fire Hose

This fire hose is both UL and FM approved, ensuring compliance with stringent industry standards. It is constructed from durable materials, providing high resistance to abrasion, ozone, UV radiation, and oil.

Product Overview

High-Performance Synthetic Fire Hose

This synthetic fire hose is engineered with a circular woven polyester jacket and a thin-walled synthetic rubber lining to provide a durable yet lightweight solution. Its unique vulcanizing technique ensures superior flexibility and a long service life, making it highly reliable for demanding fire suppression tasks. Designed for efficiency, the hose features a small coil diameter, making it an ideal choice for both fire brigades and space-constrained wall hydrant cabinet installations.

Certifications

UL Approved, FM Approved, CE Certified

Construction

Jacket Construction

Circular woven firm polyester fibre with double twisted warp

Internal Lining

Thin-walled synthetic rubber

Performance

Durability and Resilience

- Abrasion resistant
- Wear and tear resistant
- High flexibility
- Elasticity

Applications

Recommended Applications

- Fire brigades
- Wall hydrant cabinets
- Industrial fire protection systems
