Product Overview

Professional Deep-Freezing Solution

The DW-200 is a high-performance chest freezer designed for critical deep-low temperature storage applications. With a generous 193-liter capacity, it is engineered to maintain cell activity and preserve the integrity of sensitive materials or food products. Featuring precise electronic temperature control and superior foam insulation, this unit ensures reliable, energy-efficient performance in demanding environments.

Technical Specifications

Internal Volume	193 L
Temperature Range	-45°C, -55°C, -65°C, -86°C
Control System	Electronic temperature control

Design & Build

Key Features

- Secure lid with handle
- Durable casters for mobility
- Ventilation grills for cooling efficiency

Insulation	High-efficiency foam layer
Mobility	Yes
