

Ultrasonic Air Humidifier

This ultrasonic humidifier efficiently increases humidity levels using ultrasonic technology. It features a transparent water tank for monitoring water levels and a control knob for adjusting the mist output.

Product Overview

Professional Ultrasonic Air Humidifier

This ultrasonic air humidifier is designed to efficiently increase moisture levels in professional or living environments using advanced high-frequency sound waves. The unit features adjustable mist volume control and an automatic safety shut-off mechanism that activates when the water reservoir is empty. With its 6-liter capacity and stable, compact design, it is an ideal solution for maintaining comfortable air quality in bedrooms, offices, and shared spaces.
