

Ultrasonic Anion Aroma Diffuser Humidifier

This ultrasonic aroma diffuser enhances air quality through aroma diffusion and humidification. It uses ultrasonic technology to break down essential oils and water into micro-particles, creating a fine mist that disperses throughout the room.

Overview

A Multi-Functional Wellness Solution

This ultrasonic aroma diffuser combines air purification, humidification, and aromatherapy into one compact device. Utilizing advanced ultrasonic technology to disperse a fine mist, it effectively improves air quality in small to medium-sized spaces up to 30m². With customizable mist settings, integrated LED lighting, and negative ion generation, it provides a versatile solution for creating a soothing and balanced indoor environment.

Key Features

Core Functions

Aroma Diffuser, Humidifier, Air Purifier, Anion Generator, LED Lighting

Performance

Performance Metrics

30 m²

Usable Area

50 mL/hour

Mist Output

3 million/m³

Anion Concentration

Technical Specifications

Electrical Requirements

Parameter	Value
Input Voltage	100-240V AC
Frequency	50/60Hz
Output Power	24V DC, 650mAh
Power Consumption	15.6W
Ultrasonic Frequency	1.7MHz

Operating Modes

- Continuous operation until auto-off (insufficient water)
- Intermittent: 5 minutes on / 1 minute off (with LED)
- Intermittent: 30 minutes on / 30 minutes off (without LED)

Design & Physical

Physical Dimensions	125 mm (width)
Water Tank Capacity	200 mL
Construction Materials	PP Water Bank, ABS Outer Case

Logistics

Container Loading Capacity

Container Type	Sets
20ft	7175
40ft	14832
40HQ	17376
