

Ultrasonic Aroma Diffuser with Color-Changing LED

This ultrasonic aroma diffuser improves air quality and creates a relaxing atmosphere. It uses ultrasonic technology to break water and essential oils into fine micro-particles without heat, preserving the oils' therapeutic properties.

Product Overview

Ultrasonic Aroma Diffuser

The H118 is a professional-grade ultrasonic aroma diffuser designed to enhance air quality and create a relaxing atmosphere in homes, offices, and spas. By utilizing advanced ultrasonic technology, it disperses essential oils as fine micro-particles without the use of heat, ensuring the preservation of their therapeutic properties. This unit combines functional performance with ambient LED lighting to provide a comprehensive wellness solution.

Technical Specifications

Water Tank Capacity	100 ml
Mist Output	30 ml/hour
Ultrasonic Frequency	2.4 MHz
Coverage Area	25 sqm
Continuous Operation	3 hours

Power & Safety

Safety Features

- Automatic shut-off on low water level
- Heat-free operation

Power Input	100-240V AC, 50/60Hz
-------------	----------------------

Design & Build

Key Features

Color-changing LED • Quiet Operation • Ultrasonic Technology

Dimensions	10cm (diameter) x 20cm (height)
Material Composition	PP, ABS
