Overview

Professional Ultrasonic Aromatherapy Solution

This multi-function ultrasonic aroma diffuser is designed to enhance indoor air quality through advanced humidification and negative ion generation. Utilizing high-frequency ultrasonic technology, it efficiently disperses essential oils without heat, preserving their therapeutic benefits. With customizable mist settings and integrated LED mood lighting, this device is an ideal solution for creating comfortable and relaxing environments in offices, homes, and wellness spaces.

Key Features

Certifications

CE • FCC • RoHS

Core Functions

Aroma Diffuser, Humidifier, Air Purifier, Negative Ion Generator, LED Mood Light

Performance Metrics

Performance Specifications

60 mL/hour

Max Mist Output

30 m2

Coverage Area

200 mL

Tank Capacity

3 million/m3

Anion Concentration

Technical Details

Electrical Specifications

Parameter	Value
Ultrasonic Frequency	1.7 MHz
Input Power	100-240V AC, 50/60Hz
Output Power	24V DC, 650mAh
Power Consumption	15.6 W

Operating Modes

- Continuous mist until water depletion
- Intermittent: 5 min ON / 1 min OFF (LED ON)
- Intermittent: 30 min ON / 30 min OFF (LED OFF)
