

Ultrasonic Cool Mist Aroma Diffuser

This ultrasonic aroma diffuser utilizes high-frequency ultrasonic vibrations to create a fine, cool mist that carries the fragrance of essential oils. It features adjustable mist settings and an automatic shut-off function for safety and convenience.

Product Overview

Aromatic Ultrasonic Performance

This ultrasonic cool mist aroma diffuser is designed to efficiently distribute essential oils through high-frequency vibration, creating a fine, relaxing mist. With a generous 500ml capacity and flexible mist modes, it provides up to 10 hours of continuous operation for home or office environments. Its quiet functionality and color-changing ambient lighting make it an ideal choice for enhancing workspace or bedroom atmosphere.
