Product Overview

Professional Ultrasonic Humidifier

This ultrasonic cool mist humidifier utilizes advanced high-frequency vibrations to disperse a fine, consistent mist, effectively optimizing indoor air quality. Designed for user-friendly operation, it features a precise rotary dial for adjustable mist output and a clear water level indicator for maintenance. With its quiet performance and integrated LED status features, this unit provides an efficient solution for maintaining comfortable humidity levels in various professional or residential settings.

Technical Specifications

Mist Control	Adjustable rotary dial (Min to Max)
Status Indicators	LED Power Indicator, LED Night Light
Operation	Ultrasonic high-frequency vibration

Features

Monitoring

- Transparent water level window
- Quiet operation
- Rotary mist output control
- Integrated status light
